Rome is a living museum, a city where history, art, and modern joie de vivre converge. This vibrant metropolis boasts the world's greatest concentration of impressive historical and architectural monuments, expressions of its rich historical, artistic, and cultural heritage. The historic center, Vatican City, and St. Peter's Basilica have been UNESCO World Heritage Sites since 1980. Rome is also known as the capital of two states, as it contains the heart of Christianity – the enclave of Vatican City.

On the **first day of the congress**, participants can choose from two guided tours on the theme of "water". Please have a look in the congress brochure.

On Thursday, the **second day of the congress**, the accompanying tour invites participants to the Tiber Island, the Jewish Quarter, and, in the afternoon, the medieval Trastevere district. The **third day of the congress** is free for participants to explore at their leisure
